

SnugglePuppy™, SnuggleKitty™ Owner's Manual

Thank you for purchasing our SnugglePuppy™ or SnuggleKitty™. We hope that you are satisfied with your purchase and if you have any questions, comments or concerns, please call Choice Pet Products at (888) 218-8292. As "your pet's pet," we thought you might like a few suggestions for use.

1. To use the heart beat, first remove the white tab from heart and discard, then simply switch it on. The batteries are long life, however we suggest turning off the heart beat when not in use. Replace the batteries with a quality brand when necessary, using 2 of style 357 or 3 of style 389 calculator or watch batteries. Place the heart beat in the underside pocket.

2. Your SnugglePuppy™ or SnuggleKitty™ comes with a disposable heat pack that last up to 24 hours when exposed to air. To activate, open the pouch and let it stand for 10 minutes. Open the underside pocket of the Snuggle pet and insert. If you do not need to use the heater for the entire 24 hours, simply put it in a ziplock reclosable plastic bag to eliminate the air activation. Throw away when finished. Do not put the disposable heat pack in the microwave.

Another type of recommended heat is dry rice. Use a terry cloth pouch or similar (not provided). Take 1/2 cup of dry white rice and place inside the terry cloth bag, place in the microwave. Because heating in microwaves varies try warming the rice for one (1) minute. Do not boil or bake the rice. Rice heat is moister than the disposable heat and lasts up to three hours. Be careful to not overheat the rice, a "burnt" smell is unpleasant to animals. Exercise caution when handling either heat source-they do get hot.

3. While testing the SnugglePuppy™, we found that placing a worn, human scented sock inside the pocket reassures your pet. This worked particularly well when animals needed to be transported to unfamiliar places-like the kennel or vet.

4. The SnugglePuppy™ or SnuggleKitty™ is machine washable in warm water, gentle cycle, no harsh detergents. Please air dry. Be sure to empty the underside pocket of all contents before washing.

5. Our products are designed like our slogan: "Soul Satisfying Products for Your Pet." If you have any other suggestions please call us-we'd like to hear from you. It has come to our attention that the SnugglePuppy™ and SnuggleKitty™ would be great for other types of pets and even people too. We hope that you will use proper discretion if you use them for small children or large snakes.

Special Baby Bottle Feature

Our SnugglePuppy™ and SnuggleKitty™ can now help baby animals feed themselves. Simply insert a small bottle in the underside pocket. The nipple will stick out between the legs of the SnugglePuppy™ or SnuggleKitty™. Use the Velcro® tab to hold bottle in place. For best results, watch the animal while feeding. We recommend not leaving formula in the bottle longer than manufacturer's guidelines. Need help? Please call us at (800) 463-4107 or visit us online at www.snugglepuppy.com -We welcome your comments!

Disposable Heater Directions

Open package and expose heater to air. No kneading or shaking required. Place heater in the underside pocket. The disposable heater lasts up to 24 hours. If you do not need to use the heater for the entire 24 hours, simply put it in a zip reclosable plastic bag to eliminate the air activation. Contents are environmentally safe, nontoxic and disposable with normal trash. Do not put the disposable heat pack in the microwave.

CAUTION: Heaters are for external use only! Do not place warmer directly on skin, heat may cause burns. Warmer won't be effective if wet. Do not open inner pack. If inner pack contents come in contact with skin, mouth or eyes, flush instantly with cold water.
